SUMMARY

Frontend Web Developer skilled in HTML, CSS, JavaScript, and React. Built responsive and interactive web applications including a YouTube clone, anime tracker, and movie listing site. Completed internship at Cygnetic Software, collaborating on real-world projects using modern front-end workflows. Strong eye for UI/UX design, eager to contribute to startup teams building user-friendly products.

PROFESSIONAL EXPERIENCE

Frontend Development Intern, Cygnetic Software   Jun 2022 - Aug 2022
- Assisted in developing responsive user interfaces using HTML, CSS, and JavaScript.
- Collaborated with the design team to convert Figma wireframes into functional web pages.
- Debugged UI issues and optimized performance across major browsers and devices.

PROJECTS

YouTube Clone (Web Project)
- Recreated YouTube interface with video playback, navigation menus, and dynamic layout.

IMDB Clone (Web Project)
- Built a movie listing app with search and review features, inspired by IMDb's UI.

MyAnimeList Clone (Web Project)
- Designed a platform to list and rate anime, with interactive UI and search filtering.

MP3 Player using C++
- Created a desktop music player with playlist features, file handling, and media controls.
